BodyTalk

language of health

“BodyTalk is an exciting new approach to health and vitality. The procedure is so simple, yet so effective as each treatment is individualised and personalised. The techniques that form part of this unique system are safe and gentle. Since I have been having Bodytalk, I have experienced a reduction in stress levels and an increase in energy. Life’s challenges are easier to face and balance has been restored in my life due to the miracle of Bodytalk.” J. Schloss

The BodyTalk System™ is a revolutionary form of alternative healthcare that utilises the body’s natural ability to heal itself. BodyTalk works with innate wisdom (eg. our inbuilt ability to heal a cut finger) to allow the body’s energy systems to be re-synchronised so that they can operate as nature intended. Each system, cell and atom is in constant communication with each other at all times.

Because the BodyTalk System™ works with the body’s own healing abilities, clients see long-lasting, ongoing improvements in health rather than short-term symptomatic relief. Clinical experience has shown that BodyTalk clients have shown vast improvements in their health and wellness.

Through exposure to the stresses of day-to-day life, these lines of communication become compromised, which then leads to a decline in physical, emotional and/or mental health. Reconnecting these lines of communication then enables the body’s mechanisms to function at optimal levels, thus preventing disease and rapidly accelerating the healing process.

BodyTalk can be useful in a number of situations - **i)** it can be used to address specific diseases and disorders, **ii)** it can be used as a means of maintenance and prevention to keep the body in good health, and **iii)** it can be used to complement other treatment modalities.

BodyTalk has proven to be very effective in addressing many common diseases such as dyslexia, chronic viruses and infections, allergies, poor immune system functioning, sugar metabolism disorders, arthritis and general musculo-skeletal disorders, emotional and psychological problems, and this is just to name a few.

The BodyTalk System™ is one of the rare health care systems that can be classified as totally safe and truly holistic in its approach to reestablishing the optimum health of the client.
